- Anrep effect, 8, 129  
Arrhythmogenic cardiomyopathy (ACM), 97  
Arrhythmogenic right ventricular cardiomyopathy (ARVC)  
case history, 93  
catheter ablation, 115  
clinical manifestations, 99  
definitive pathological diagnosis, 111  
diagnostic tests  
cardiac imaging, 101–104, 106, 107  
electrocardiography, 100, 105  
electrophysiologic study, 108  
endomyocardial biopsy, 110  
genetic testing, 109–111  
differential diagnosis, 113  
genetics, 98  
ICD implantation, 114  
management, 114, 115  
paced rhythm, 96  
pathogenic mutations, 96  
pathology, 97  
pathophysiology, 98

- patient evaluation, 95, 96  
prevalence, 97  
prognosis, 100  
screening, 116  
triangle of dysplasia, 99

## C

- Carcinoid heart disease (CHD)  
clinical manifestations, 174  
initial diagnostic work-up  
chest radiography, 174  
chromogranin A, 175  
CMR imaging, 176  
functional imaging with  
radiolabeled somatostatin analogues, 176  
NT-proBNP levels, 175  
plasma and urinary 5-HIAA levels, 175  
3D echocardiography, 175  
transthoracic echocardiography, 175  
interventional percutaneous strategies, 185  
medical management, 182, 183  
pathophysiology, 172–174  
tricuspid valve replacement, 183–185

- Carcinoid plaques, 174  
Carcinoid syndrome, 173  
Carcinoid tumors release vasoactive substances, 172  
Cardiac rehabilitation (CR) baseline assessment, 231 exercise training regimen, 231 exercise treadmill test, 231 heart failure with preserved ejection fraction, 236, 237 heart failure with reduced ejection fraction, 234–236 heart transplant, 239 history, 229, 230 indications, 232 left ventricular assist device, 238, 239 medical barriers, 240 phases, 231 pulmonary hypertension, 237, 238  
Cardiac resynchronization therapy (CRT), 83  
Cardiohepatic syndrome, 14  
Cardiopulmonary exercise testing (CPET), 85  
Cardiorenal syndrome (CRS), 13  
Catheter-based pulmonary angiography, 134  
Catheter-directed thrombus removal or thrombolysis, 137  
CentriMag right ventricular assist device (RVAS), 203, 204  
Chronic thromboembolic pulmonary hypertension (CTEPH), 164  
Congenital heart disease, 29  
Continuous flow left ventricular assist devices (CF-LVADs), 216  
Contractile reserve mechanisms, 130  
Coronary perfusion pattern, 129
- D**  
D-dimer test, 132  
Diastolic ventricular interdependence, 11, 12  
Digoxin, 36  
Doppler tissue imaging (DTI)-derived tricuspid lateral annular systolic velocity wave (S'), 50
- E**  
Ebstein's anomaly, 58  
Electrocardiography (ECG), 31–32, 94–96, 100, 105  
Electronic medical record (EMR), 240  
Electrophysiologic study (EPS), 108  
Endomyocardial biopsy, 110  
End systolic pressure volume relationship (ESPVR), 7  
Epicardial coronary artery, 58  
Epsilon wave, 100, 105  
Exercise treadmill test (ETT), 231  
Extra corporeal membrane oxygenation (ECMO), 131
- F**  
Fractional area change (FAC), 50  
Frank Starling mechanism, 8  
Free wall longitudinal strain (FWGLS), 54–55
- G**  
Gastrointestinal neuroendocrine tumors, 172

**H**
